

At SCI, we build strong partnerships with our clients, combining over 80 years of expertise in certification, risk management, and governance. We deliver tailored solutions that drive results by integrating innovative technologies with our experience. Flexible and forward-thinking, we adapt to your needs, offering bespoke services grounded in trust and innovation.

Our Approach to Agriculture & Animal Welfare Solutions

Precision Audits & Compliance

- **Unannounced Audit Programs** – Real-world compliance assessments that offer authentic insights

- **Assurance Audits** – Independent, transparent evaluations conducted by hand-selected industry experts.

- **Customized Governance Solutions** – Tailored assessments ensure your due diligence programs are optimized for efficiency and impact

Strategic Agricultural Solutions

- **Gap Analysis & Risk Benchmarking** – Identify vulnerabilities and outperform competitors with precision assessments.

- **Standards Development & Enhancement** – Align your agricultural protocols with global best practices.

- **Traceability & Provenance Innovations** – Leverage cutting-edge DNA testing, mass spectrometry, and live tracking to ensure uncompromised product integrity.

Beyond Compliance: Future-Proofing Agriculture

- **Technical Expertise on Demand** – A vast network of specialists is available for short-term and long-term needs.

- **Integrated Governance & Training** – Seamless solutions that blend regulatory compliance with practical, actionable education.

- **Sustainability & Innovation** – Horizon-scanning strategies that ensure your practices stay ahead of industry shifts

The Use Case

Problem

The client's visibility of suppliers relied entirely on advance notice audits. The client required assurance that suppliers fulfilled their customer commitments and pursued stronger supplier relationships and accountability.

Approach

Partnering with SCI, we developed a targeted questionnaire for the client's short-notice visits by independent auditors. The questionnaire focused on physical inspections rather than paperwork. After successful pilot visits, the program was expanded.

Results

The newly created "assurance visit" audits helped the client identify ways to support and assist suppliers, improving mutual understanding and enhancing daily standards. The program has since been expanded to additional supplier areas.
